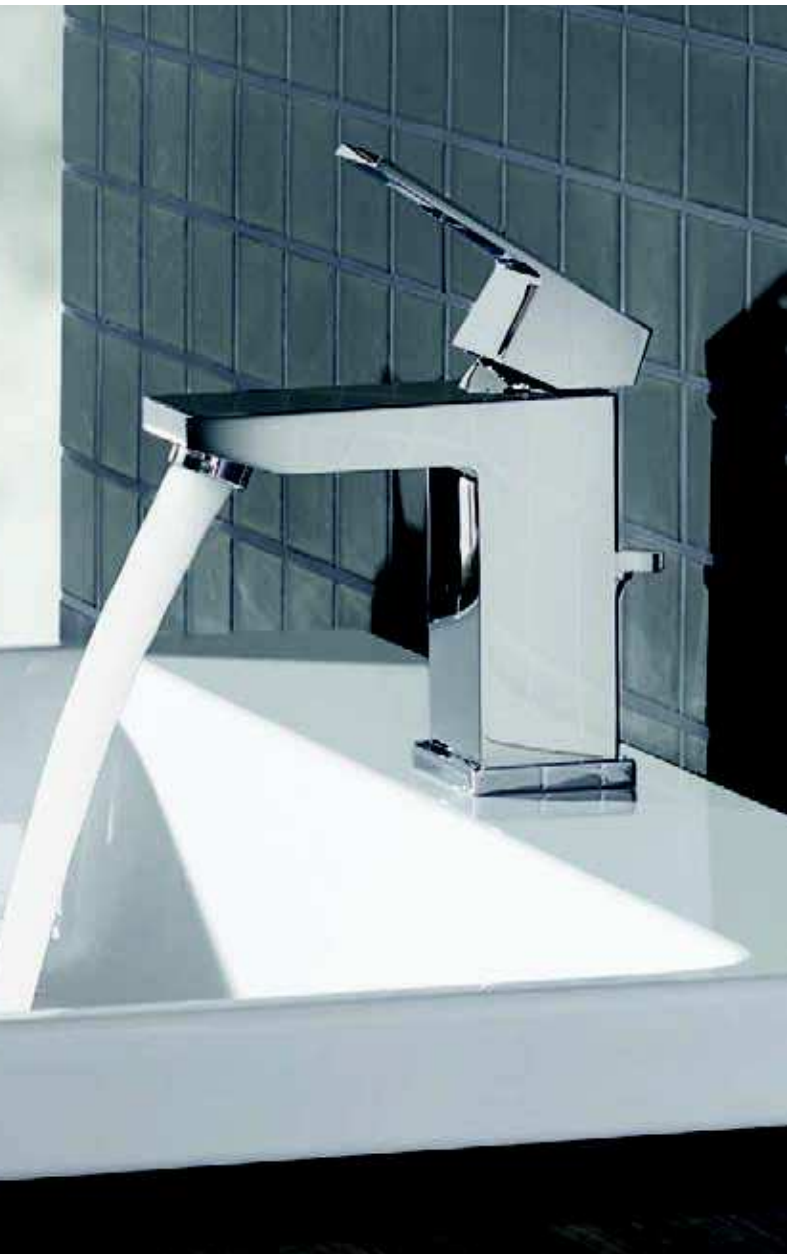
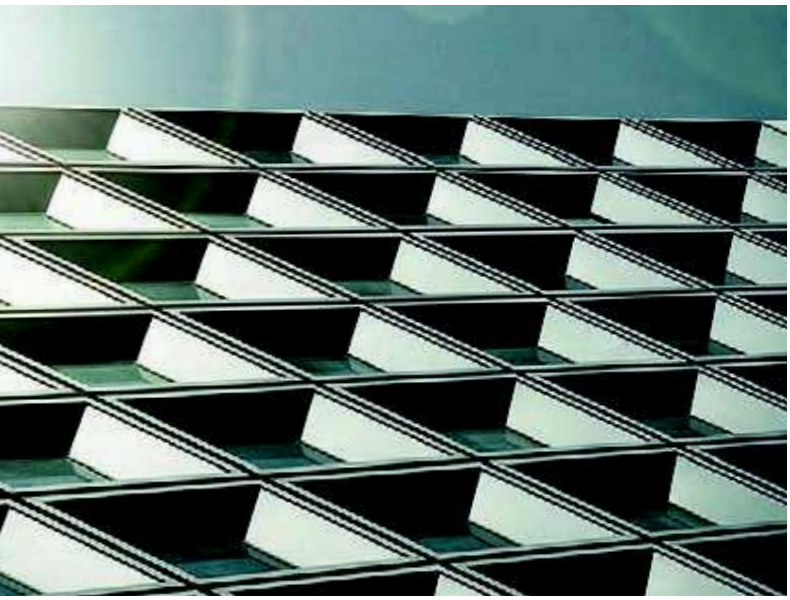
The styles range from classical elegance to simple minimalism: softly purist, harmoniously sensual and timelessly practical. Furthermore, all of our bathrooms offer an incredibly wide range of technical features, sizes, materials, colours and details.

Let the six different looks in the GROHE Collections be your inspiration before deciding, at your leisure, which of them is perfectly tailored to you.



EUROCUBE BATHROOM MAKE A CLEAR STATEMENT

Straightforward, attractive and always focused on the essential. Cosmopolitan life in the teeming city becomes a bit more manageable if you are surrounded by straight lines. The overarching concept of GROHE Eurocube evokes the dynamic lifestyle of busy people and celebrates the dramatic beauty of the cube. Enjoy a bit of clarity.



Pure metropolitan design. No ifs, no buts, no deviations. Eurocube bath architecture has that clear sense of rigour that comes with innovative technology, exemplified by the GROHE StarLight® chrome finish.

Modern rationality. The sharply cut square blends visually with the flat surfaces of the elegant double washbasin and the luxurious wall-mounted WC for a harmonious effect.

Eurocube's angular looks conceal something silky soft:
GROHE SilkMove® technology for easy handling.

Clear profile. The minimalist 4-hole tub and bold, artistic design combine to form a greater whole.

The modern Eurocube Shower combination with Rainshower® echoes the angular styling.

Innovative design, strictly applied. This range's cubic forms are reflected in all fittings, complementing the whole bathroom to the smallest detail. The geometric washbasin faucet employs straight lines and delivers a perfect stream of water thanks to the slightly chamfered spout.

For product information and technical details please see page 186 and following.

A striking style element, the square cut-out detail on the lever handle softens the angularity and lends a unique look.

ESSENCE BATHROOM
UNDERSTATED ELEGANCE

Luxurious shower: The wall-integrated shower solution with Rainshower® head shower and Euphoria stick hand spray adds a luxury touch to your daily shower experience. The design corresponds to the graceful understatement of the Essence range perfectly.

Perfectly sensual. Time and again, Essence uses the cylindrical form in exciting ways. An artful play of shapes recurs throughout the range, from luxurious showers to architecturally shaped washbasins and radiant fittings which are available in sizes S to XL.

Simply beautiful. This elegant freestanding bath is the embodiment of modern luxury. On its own, it is a dramatic centrepiece. The elegant matching floor-mounted bath faucet harmonises perfectly with the distinctive Essence design. Beautiful innovations include GROHE StarLight® for a chrome finish with long-lasting shine.

COMFORT, SAFETY, SAVINGS

We've all been there before. You've just stepped into the shower when someone else in the house either turns on a faucet or flushes the toilet; suddenly the temperature of your shower plummets or becomes scalding hot – leaving you with soap in your eyes as you try to manually adjust the temperature back to a comfortable level. Install a GROHE thermostat and you can be sure of a safe and enjoyable showering experience every time.

What's inside? Thermostatic valves work by constantly mixing hot and cold water to a pre-selected temperature. Even if there is a change in the water supply, the thermostat reacts by rebalancing the quantities of hot and cold water to maintain the correct temperature. In the most extreme cases, i.e. should the cold water supply fail, the hot water shuts off automatically in a fraction of a second to prevent scalding.

Style choices. GROHE offers concealed and exposed thermostats. With concealed models, the body of the mixer is installed behind the wall. With exposed thermostats, the mixer is mounted on the wall and all the pipe work is behind the wall.

User-friendly features. Our thermostats also feature a SafeStop button, to prevent children from turning up the temperature and scalding themselves, and an EcoButton to reduce water usage by up to 50%. Our EasyLogic controls are intuitive to use and cater to the entire family, whatever their height, while the AquaDimmer allows you to turn the water on and off, adjust the flow rate and divert between two water outlets, e.g. hand shower and bath spout.

GROHE thermostats based on winning technology. LGA QualiTest GmbH, a subsidiary of TÜV Rheinland, carried out a major product test in 2006 comparing several thermostats from leading European manufacturers. Our Grohtherm thermostats came out on top, receiving Number One ranking, thanks to their GROHE TurboStat® and GROHE CoolTouch® technologies.
These results have strengthened us in our mission to continuously develop innovative technologies, as our aim is to offer you the best possible technology, always.

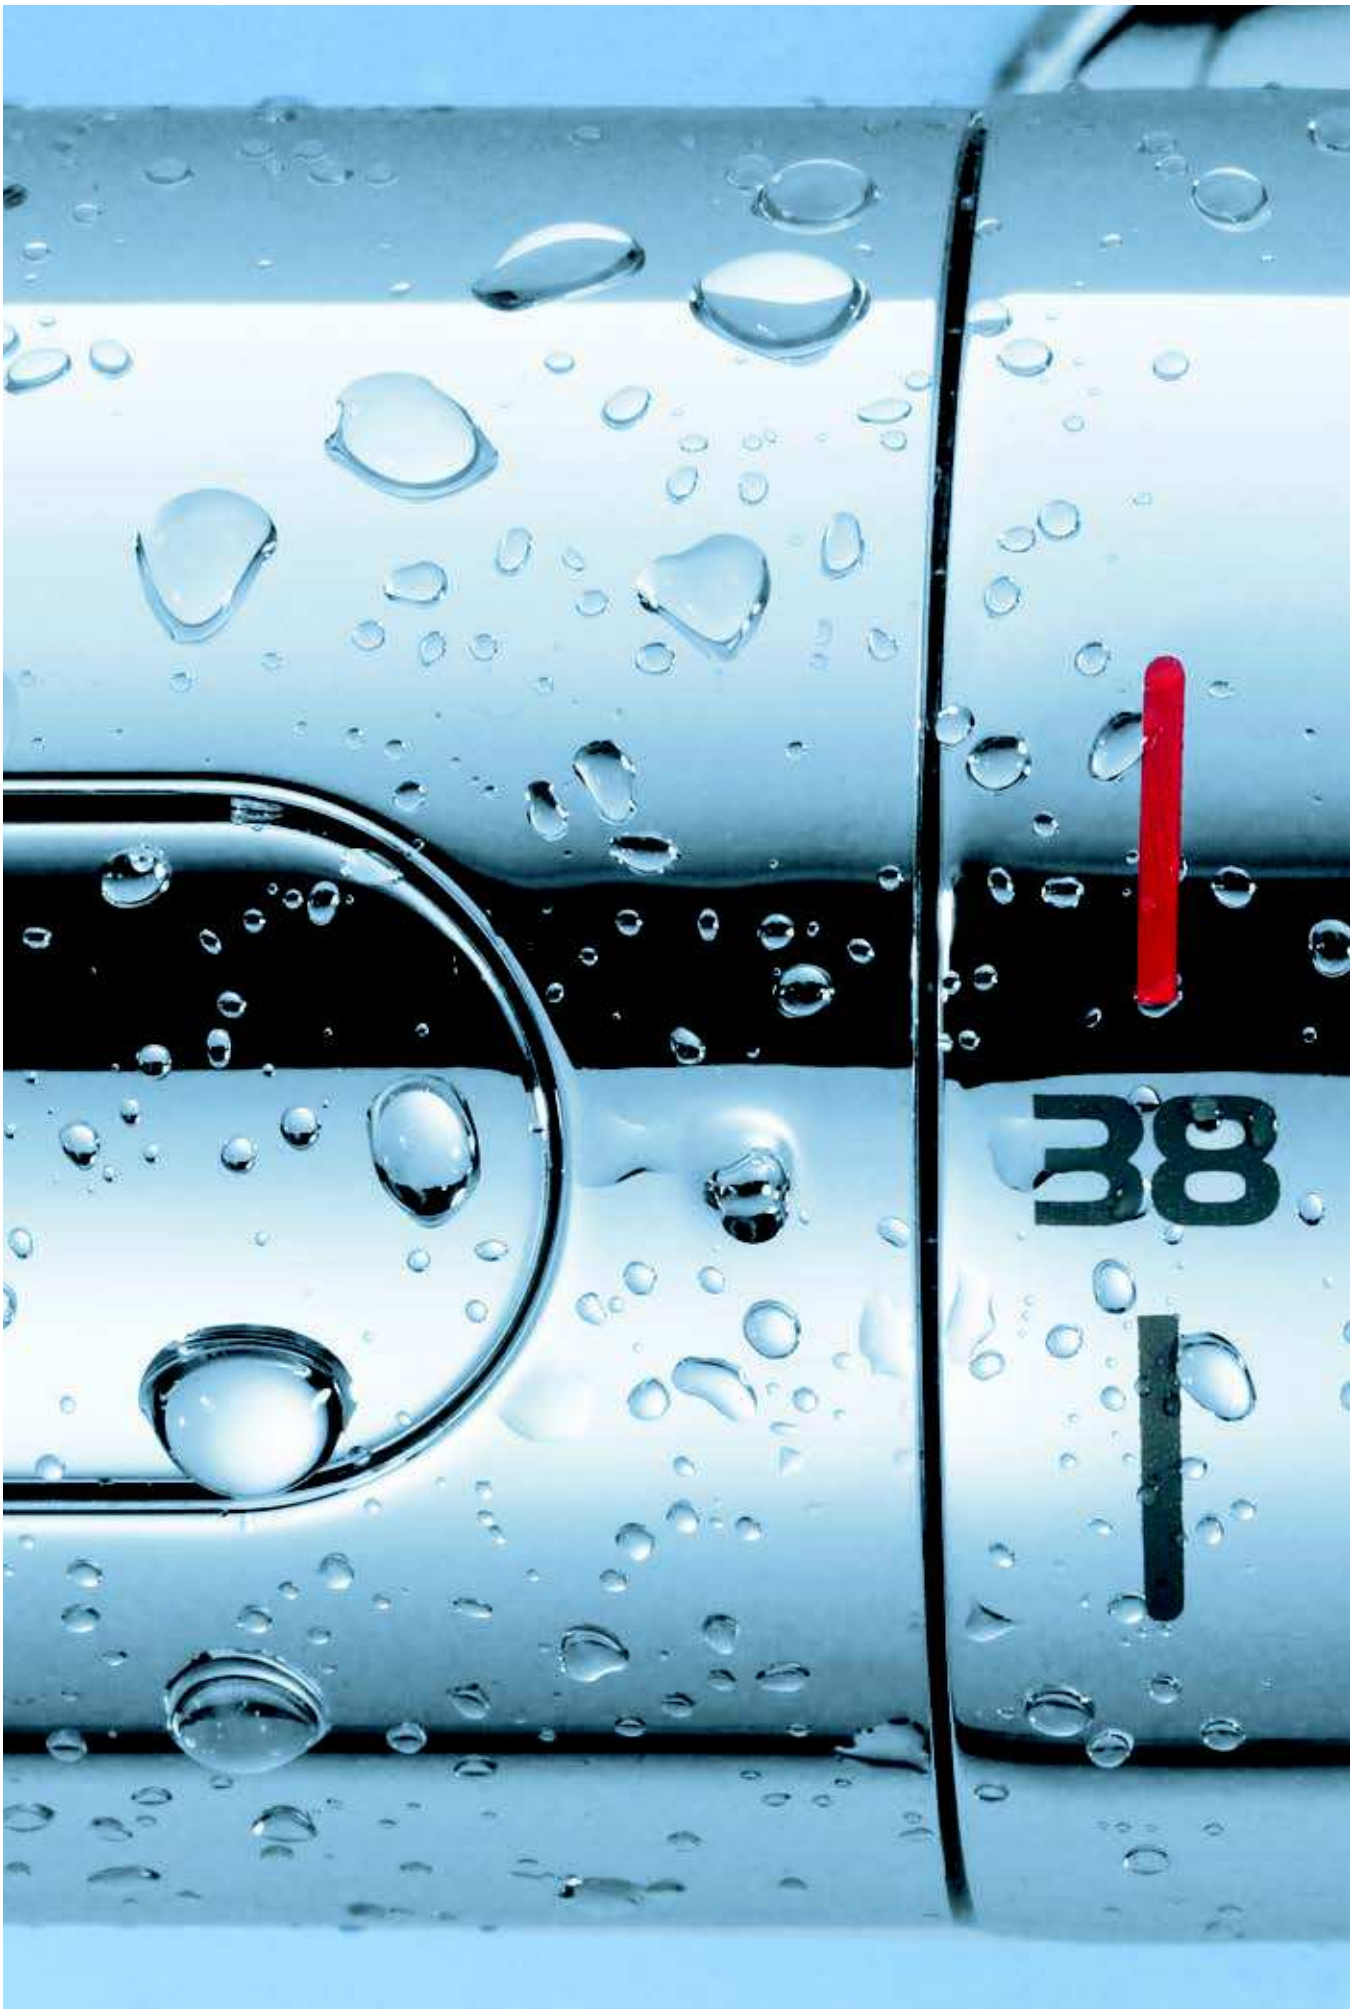
GROHE's quick guide to thermostat technology.

What is a thermostat?
A thermostat maintains an exact water temperature of your choice, independent of water use elswhere at home.

How does it work?
The thermostatic mixer valve mixes the hot and cold water and reacts instantly to any changes in the supplies, ensuring the temperature is maintained within one degree deviation.

What are the benefits?
The pre-set temperature is reached within a fraction of a second and remains constant so there's no risk of scalding.

Are there different types available?
Yes, GROHE offers many different models to suit every style of bathroom.



38

GROHE TURBOSTAT®

Always the right temperature, for ultimate convenience and safety. GROHE TurboStat® technology lies at the heart of our new thermostat.
The thermo-element's unrivaled sensitivity means it delivers water at the desired temperature within a fraction of a second – and keeps it constant for the duration of your shower. No more time and water wasted getting the temperature right. And if the cold water supply fails, it reacts instantly: hot water will shut off automatically to avoid the risk of scalding.

Compensating precisely for fluctuations in temperature and pressure results in a consistent and comfortable shower throughout.

GROHE COOLTOUCH®

Safety first with 100% GROHE CoolTouch®. GROHE's CoolTouch® technology ensures that the entire outer surface never exceeds your preferred shower temperature. By designing our thermostats to include an innovative cooling channel, we have created a barrier between the hot water and the chrome surface - so it's never too hot to handle. This safety measure is especially useful for children, who can not always judge whether something they touch is dangerously hot.

GROHE HYGIENE AND GROHE POWERFLUSH

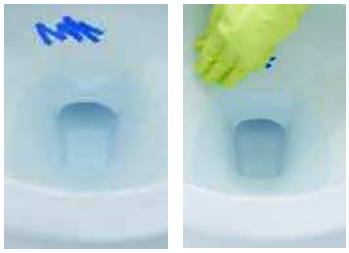
The perfect combination for ultimate cleanliness.
Whether you choose GROHE Sensia® Premo, GROHE Sensia® CBS, GROHE Sensia® Arena or a traditional toilet from our GROHE Complete Bathroom Solutions, you will still reap the benefits of GROHE Hygiene and GROHE PowerFlush.

GROHE Hygiene – most innovative ceramic quality
The toilet ceramic of selected GROHE shower toilets, as well as toilets in our stylish bathroom lines, is special because of its innovative glazings. The special ceramic surface and the rimless design together set a new standard for toilet bowl hygiene and cleanliness.

SIAA ISO22196 for KOHKIN

Ceramic materials proudly feature the SIAA (Society of Industrial-technology for Antimicrobial Articles) brand mark based on ISO for KOHKIN – stringent criteria for the antibacterial effect and the safety of the agent.

GROHE Hygiene premium coating excels because of two technologies:



ProGuard – the non-stick glazing ensures a completely clean toilet.

HyperClean – this permanent special glazing reduces more than 99% of all germs.

GROHE PowerFlush – the new generation of flushing technology. The unique combination of the GROHE rimless toilet bowl design and our latest flush technology bears the powerful name GROHE PowerFlush. In this unique system, water is introduced into the bowl at ‚full power' from two nozzles located on the rim (there's the option of a third nozzle in the toilet interior). Activating the sophisticated water injection system results in a swirling action with strong suction, amplified by the shape of the toilet bowl. The result is that the toilet bowl is completely emptied and thoroughly cleaned in a very short time. Bacteria, dirt and germs are transported safely to waste – leaving no residues. How much do you value hygiene? PowerFlush gives you a choice between a double system (Double Vortex Flush) or a triple system (Triple Vortex Flush).

PowerFlush technology works in a strikingly simple manner:

1. The water flows from two (optionally three) holes.

2. The power of the inflow is concentrated and increased as a result of the unique shape of the GROHE toilet bowl.

3. The swirling action causes the whole inside of the bowl to be perfectly cleaned.

The new GROHE Sensia® shower toilets and ceramic toilets, part of our new GROHE Complete Bathroom Solutions, let you enjoy complete peace of mind with unmatched hygiene and cleanliness.

MADE IN GERMANY

A passion for quality. Precision crafted to the highest standards. Precision is synonymous with the GROHE brand. Our "Made in Germany" seal of exceptional quality has always characterised our work. We believe that this is in large part because our award-winning designer and development teams are all based in Germany, home to the highest quality products in the world. We are proud of upholding this German tradition and we guarantee our customers consistently superior manufacturing – down to the smallest detail. GROHE also delivers top quality product development. At our facility in Hemer, in the Sauerland region, our engineers and designers work hand in hand to refine our innovative ideas. We hold all our facilities in Germany, Portugal and Thailand to the same GROHE quality promise and high manufacturing standards. We live by our global standard of perfection.

GEORGIOS VLACHODIMOS

Master of Technology, takes a sample of GROHE's handmade very own brass.

SUSTAINABILITY

Sustainability starts with quality. If you decide on GROHE, you choose safe products which were created to be long-lasting and resource-friendly. We impose the most stringent durability tests with 15-year service life conditions. We want you to enjoy your GROHE products for many years to come. Sustainability is a pervasive and essential part of our corporate culture. You can enjoy your GROHE bathroom solutions with a clear conscience for many reasons:

Innovative energy conservation. We have developed countless innovative technologies which will help you to conserve energy without having to sacrifice comfort and pleasure in the bath. For example, the thermostats with GROHE TurboStat® technology reach the desired shower temperature within seconds. And fittings using GROHE SilkMove® ES combine ultimate ease of use with energy-saving innovations. This modern technology prevents the unnecessary heating of water when you use the moderate setting.

Smart water conservation. Respectful water resource management is another topic close to our hearts. Many of our fittings and shower systems are equipped with the revolutionary GROHE EcoJoy water conservation technology, reducing water use by up to 50%.

Social responsibility. As an international company, we are aware of our responsibilities to the environment. We maintain an open and objective dialogue with the general public. At our facilities we promote environmental awareness to improve the health and safety standards of our employees.

Surveillance by independent certification partners. Each of our facilities is regularly inspected by independent, external certification authorities in health, safety and environmental protection to ensure compliance with ISO standards. We follow the International Standards ISO 14001:2009 and OHSAS: 2007.

MOMENTS OF TRUTH

GROHE's Masters of Technology announce the innovative quality of their work in so-called "Moments of Truth". These are the moments when the end-user becomes aware of the tangible benefits that the product offers, as well as the achievement that it represents, for the very first time. At these times, all the efforts that have gone into research, development, production and refinement result in genuine delight and authentic satisfaction for the customer.
